

FusionSave Success Report

How Enterprises Saved Over
\$500K in Oracle Fusion Costs

Fusion\$ave

Introduction:

The Hidden Cost of Cloud Overuse

Introduction: The Hidden Cost of Cloud Overuse

Oracle Fusion Cloud offers flexibility and scalability - but without precise visibility into usage, most enterprises end up paying for far more than they need. Unused licenses, inactive users, and misaligned entitlements quietly drain budgets while creating compliance blind spots.

FusionSave was built to fix this - bringing clarity, control, and cost-efficiency back to enterprise cloud management.

Our Approach:

Smart Optimization, Not Just Reduction

Our Approach: Smart Optimization, Not Just Reduction

Unlike traditional cost-cutting tools, FusionSave focuses on subscription optimization, not downsizing.

It continuously analyses user activity, license utilization, and entitlements across ERP, HCM, SCM, and other Oracle Fusion modules - ensuring every subscription is right-sized and compliant.

Through a blend of automation, analytics, and compliance intelligence, FusionSave helps enterprises:

-  Identify overused or underutilized subscriptions
-  Align entitlements with actual business needs
-  Maintain full compliance with Oracle's licensing policies
-  Track usage in real time across all business units

The FusionSave Recipe

FusionSave turns Oracle Cloud data into clear, actionable intelligence. No fluff. Just insight that cuts cost and strengthens control.

Usage Analysis:

We map real user activity to show:

- Who actually uses what
- Which roles sit idle
- Where licenses are wasted

This is where hidden savings surface fast.

Smart Access Queries:

We answer the questions that matter:

- Who truly needs access
- What can be removed safely
- Which accounts are inactive or duplicate

The result is a cleaner, audit-ready environment.

Process Insights

We convert usage patterns into operational clarity:

- How many POs are created
- Who drives key processes
- Where bottlenecks or inefficiencies live

Leadership gets the signals they need to act early.

Ongoing Optimization

Oracle usage evolves. FusionSave keeps up. We help you stay compliant, stop overspending, and stay audit-ready every quarter.

Real Impact

Across Industries

Manufacturing Major

Leading Telecom Enterprise

Real Impact Across Industries

Challenge: Excess user licenses and fragmented tracking across global entities.

Solution: FusionSave automated entitlement mapping and usage audits.

Result: 32% cost reduction within 60 days and improved audit readiness.

Challenge: Manual tracking of 12,000+ Fusion users leading to inefficiency.

Solution: FusionSave automated license tracking and reconciliation.

Result: Saved 200+ manual hours per quarter, improving financial accuracy.

Fortune 500 Enterprise

Challenge: Repeated non-compliance risks and missed renewals.

Solution: Real-time compliance dashboard with predictive alerts.

Result: Achieved 100% subscription compliance, avoiding over \$250,000 in penalties.

Challenge: Lack of visibility into global Oracle Fusion spend and user entitlements.

Solution: FusionSave's analytics module provided unified visibility.

Result: Gained clarity across 10,000+ user licenses and forecasted multi-year savings of \$500K.

Why
It Works

Why It Works

FusionSave combines **AI-driven insights** with **governance-first logic**, so every recommendation is both cost-efficient and compliant.

Where most tools stop at cost control, FusionSave goes further - aligning finance, IT, and compliance functions under one transparent view.
